Sigrig Dahle will be in residence in the gallery each day from noon to 3 pm for the duration of the exhibition (except for November 10 to 14).

Curated by Sigrig Dahle, Curator-in-Residence
24 HOURS A portion of the exhibition will change every twenty-four hours with the work of an individual artist featured each day in the gallery and uploaded to the website during the exhibition. Visit the website for a detailed schedule.

Blind Spot

BLIND SPOT TOY

USA PATENT 4,477,3358 / ISSUED 1994

It is never too early to start your Christmas holiday shopping. Why not be original this year and avoid the toys that everyone seems to be buying? Why not give the gift that keeps on giving, the "Apparatus for Aligning Image with Blind Spot of the Eye"! Patented in 1975, this toy allows the user to locate their blind spot! In order to play this amazingly fun game, strap the toy tightly on the top of your head.

Close your left eye and focus on the dangling tab with your right eye, then switch eyes. Voila! The dangling tab has disappeared into your blind spot. Not only will this invention provide endless hours of fun and good times for everyone (especially at parties), but anyone wearing this apparatus will unquestionably become irresistible to the opposite sex. Enjoy!
